Afternoon,

The Cayuse has sampled the last location for the day, SC-S019 (RM 2.7) and retrieved their sample on the first attempt. Due to the barge docked above the target location, the PreRD sampled next to the barge (photo 1), remaining within the SMA and 20ft radius from target site. The Cayuse is returning to SIL to complete coring activities for the day.

Jonni

Photo 1: extraction of first core

Photo 2: core is prepared for cutting into two 7ft segments for transport

Photo 3: core segments are iced
